

ABOUT US

Acoustic Preference enterprise is a small family-run manufacturing company established in 2001.

Music is one of the most important pleasures in a human life. Countries represent themselves with hymns; we teach our children how to sing right after they have spoken their first words. We know and produce music on all continents. Throughout the centuries, music has been saved and preserved as a part of national heritage. For this reason, at tribal ceremonies we can hear very well-known, yet somehow forgotten primeval music, which, along with the development of music and musical instruments, contribute to today's modern masterpieces. With the help of music, we can conjure up the majority of human feelings. At the same time, music represents a tool for relaxation and creativity, since it influences so many human senses.

Our goal is to create acoustic components that combine natural sounds and offer great delight when listening to music on every occasion. We want to present our clients with durability and a feeling of prestige and excellence.

We have set out to achieve our goals with great responsibility and utmost concern for our future costumers.
