

NEW GRACIOSO LINE - models 2017

We have retained only the technique and composition of the basic cabinet design, everything else is improved. Basic technique and composition of the housing structure were already remarkably effective for every price range and excellent design, therefore, they do not need to be improved.

However, Solid wood cabinets of both models are now taller with significantly more inner volume, very important for bass response. Bass response is now extended below 37Hz (Gracioso 2.0) or 39-42Hz (Gracioso 1.0); you will enjoy in powerful and ultimate bass even during quiet listening.

Design in appearance of a droplet (no parallel planes inside the cabinet) and integral wood construction system are the best for zero resonance.

Dispersed "down fire" bass reflex system for easier and better placing in room.

Bass reflex tube is placed on bottom of the cabinet conduct air via proprietary diffuser dispersed in every direction, so speaker can be placed virtually anywhere in your Listening Room.

New model line for 2017 has new special high grade drivers and better crossover.

New Ring-radiator tweeter goes up to 35 kHz in both models Gracioso 1.0 and 2.0, same in ST and LE models.

STANDARD VERSION GRACIOSO 2.0

LOUDSPEAKERS	PRICES for pair		
	MODEL	RETAIL PRICE	RETAIL PRICE
		with VAT (EU)	No VAT (EXPORT)
